Sports Coordinator Guide

How to enter results, publish them, reschedule matches
and run the chess Swiss rounds

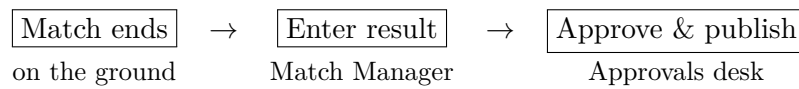

In one line: when a match ends, *you enter the final scorecard*, then *approve and publish* it. There is no live scoring this year. Standings and knockout brackets update only when a result is published.

1 The big picture

Every match follows the same short path:

- **No live scoring.** You record only the *final* scorecard of a match, in the format of your sport.
- **Two steps.** *Submitting* a result sends it for approval. It is not public yet.
- **Publishing** makes it official: it appears on the public **Results** page, updates the points table and, in a knockout, moves the winner into the next match.
- You can only work on **your own sport**. You will not see controls for other sports.

2 Signing in

1. Open the website and choose **Login**.
2. Sign in with the **Google account** you gave the organisers. It is the only login method.
3. After signing in, the organiser menu shows the pages you may use. If a page is missing, ask the Web Development team to check your role.

The pages you will use:

Page	What it is for
Match Manager (/matches)	Find a fixture, enter its result, reschedule, edit, assign officials.
Scorer (/scorer)	The same result entry in a card layout. Chess coordinators also generate Swiss rounds here.
Approvals (/results/approvals)	Approve and publish results, send one back, or correct a published result.
Standings (/standings)	Points tables for your sport.
Bracket (/bracket)	Knockout draws.

3 Entering a result

3.1 Step by step

1. Open **Match Manager**. Use the filters (sport, tournament, venue, date) to find the fixture.
2. Click **Enter result** on the fixture. A window opens on the **Result** tab.
3. Fill in the scorecard for your sport (see Section 4).
4. Optionally add *Result notes* (for example, “walkover” or “retired hurt”).
5. Click **Submit final result**. A green message says the result was *submitted for approval*.
6. Go to **Approvals** and publish it (Section 5).

Tip

The form does the arithmetic for you. You never type the winner or the final total: they are worked out from the sets, quarters, innings or boards you enter, so the headline score can never disagree with the detail.

Careful

Both teams must be known before a result can be entered. In a knockout, a match like “Winner of QF 1 vs Winner of QF 2” cannot take a result until the earlier matches are *published*.

4 What to enter, sport by sport

Sport	You enter	Shown as
Badminton (Men)	Best of 5 <i>games</i> ; each game best of 3 sets	3–2
Badminton (Women)	Best of 3 <i>games</i> ; each game best of 3 sets	2–1
Table Tennis (Men)	Best of 5 <i>matches</i> ; each best of 3 sets to 11	3–2
Table Tennis (Women)	Best of 3 <i>matches</i> ; each best of 3 sets to 11	2–1
Volleyball	Best of 5 sets (first to 3)	3–1
Basketball	4 quarters, plus overtime if level	79–71
Cricket	Runs, wickets and overs for each innings (20 overs)	“won by 12 runs”
Football	Full time; extra time and penalties if needed	1–1 (4–3 pens)
Chess	4 boards: win / draw / loss on each	2½–1½
Athletics	Position, team, athlete and time/mark per category	results table
E-Sports	Valorant: final score. Free Fire / BGMI: lobby results	points table

4.1 Badminton and table tennis (team ties)

A tie is made of several games (badminton) or matches (table tennis). Each one is best of 3 sets.

- Enter the points of every set. The third set only appears when the first two are one set each.
- **Badminton and table tennis** both stop at a majority: when one team has won enough games (badminton) or matches (table tennis), no further one is shown. Table tennis is best of 5 matches for the boys and best of 3 for the girls.
- In **table tennis** a set is played to **11 points and won by 2** (11–9, 12–10...). A score such as 11–10 is rejected.
- The boxes above each game let you type the players’ names (optional).

4.2 Volleyball

Enter set scores. Sets 1 to 3 are always shown; the 4th and 5th appear only if the match is still open.

4.3 Basketball

Enter the four quarters. A basketball game cannot end level: if the total is equal, add an **overtime period**.

4.4 Cricket

- Choose **Batted first**, then enter runs, wickets and overs for both innings. Write overs as 20 or 18.3 (18 overs, 3 balls). The maximum is 20 overs.
- The result line is worked out for you (“won by 12 runs” if the side batting first wins, “won by 4 wickets” otherwise).
- If runs are level: tick **Decided by a super over** and enter it, or choose the winner. In a knockout one of these is required.

4.5 Football

- Enter the full-time score. Tick **Went to extra time** for semi-finals and the final.
- If still level in a knockout, tick **Decided on penalties** and enter the shoot-out score. The goals stay level; the shoot-out only decides who goes through.

4.6 Chess

Each team fields **four players**. Board 1 of one team meets board 1 of the other, and so on. For each board choose 1 – 0, $\frac{1}{2} - \frac{1}{2}$ or 0 – 1. Player names are optional (the team roster is suggested). A 2–2 is a drawn match. Match points: win 2, draw 1, loss 0.

4.7 Athletics

One form covers a whole event, so all teams are entered at once.

- Men and women are separate blocks (the relay mix is one block).
- For each finisher give the **position**, team, athlete and time or distance. Use **DNS**, **DNF**, **DQ** or **NM** in the status box when there is no valid mark.
- **100 m**, **200 m** and **400 m** have a semi-final and a final. In the semi-final tick the **Q** box for the teams that qualify for the final.
- Leave unused rows without a team. Use **+ Add row** for extra finishers.

4.8 E-Sports

- **No E-Sports teams are loaded in advance.** You add every team yourself with **+ Add team**: choose the college, optionally name the squad, and click **Add**. A confirmation names the new team and it appears in the list straight away. A college may have several teams; the next one is numbered automatically (“Team 2”).
- **Valorant** is a knockout (semi-finals, 3rd place, final). Open the match, choose the two teams that played (or add them), enter the final score and submit. It cannot end level.
- **Free Fire** and **BGMI** are played in numbered games across both days: BGMI has 4 games a day for 2 days (Game 1 to Game 8) and Free Fire has 5 games a day for 2 days (Game 1 to Game 10). Each game is its own result: for every team that played enter its **kills** and **placement points (PP)** from the game’s result screen. Kill points (KP) default to the kills. **You never type the position**: it is calculated automatically from the total points, and a tie goes to the higher kill points then placement points in Free Fire, and to the higher placement points then kill points in BGMI. Leave a team blank if it did not play. The overall table adds every game up.

- **Ties on total points** are broken by: Free Fire — wins, kill points, placement points. BGMI — wins, placement points, kill points.

5 Approving and publishing

Open **Approvals**. Submitted results wait there.

1. Check the scorecard shown for each result.
2. Click **Approve & publish leaderboard**. The result becomes official.
3. If something is wrong, click **Reject (send back)** and write a reason. The entry returns for correction and can be submitted again.
4. **Bulk publish approved** publishes everything shown in one go. Check the list first.

Tip

In a knockout the winner moves into the next match *when you publish*. If the next match still shows “Winner of...”, the earlier result simply has not been published yet.

5.1 Correcting a result that is already published

A published result is protected. If it is wrong, use **Override** on the **Approvals** page (visible only if you hold that permission), enter the corrected scorecard and a **reason**. Every override is logged. The winner of a match whose winner has already moved on in a bracket cannot be changed; ask the organisers.

6 Rescheduling and editing a match

Open **Match Manager**, find the fixture and click **Manage**. The window has tabs.

6.1 Reschedule

1. Open the **Reschedule** tab.
2. Set the **New Start Time**, optionally the **New End Time**, and the **Venue**.
3. Add a **Reason** (optional but helpful).
4. Click **Confirm Reschedule**.

The system refuses a time that clashes with another match at the same venue or involves a team already playing at that time. Read the message, pick another slot or venue, and try again. A venue with several courts or tables can host that many matches at once.

6.2 Edit

The **Edit** tab changes the match number/label, the venue, the status (for example *Cancelled*) and the **Telecast** flag. It can also set the two teams of a match that has no automatic feeder.

Tip

3rd-place matches (“Loser of semi-final 1 vs Loser of semi-final 2”) are not filled automatically. After the semi-finals are published, open **Manage** → **Edit** and choose the two losing teams yourself.

6.3 Officials

The **Officials** tab lists the people assigned to the match and lets you **Assign** another.

7 Chess: running the Swiss rounds

The boys' chess is a **5-round Swiss** with the seven registered teams. Rounds are created one at a time.

1. Open the **Scorer** page. At the top you will find the panel **Chess Swiss rounds**. (It is only shown to people who manage chess.)
2. For round 1 the start time is pre-filled (3 Oct, 10:00). Check the **Venue**, **Boards at once** and **Match length**, then click **Generate round 1**.
3. The pairings appear below the button. With 7 teams, one team has a **bye** and is credited with a win.
4. Play the round, then **enter every result and publish it** (Sections 3 and 6).
5. After each round the panel shows links **After round 1**, **After round 2**... under **Standings**. They open the chess standings page (/standings/chess) as they stood *up to that round*. The same page is public: share the link, or use the round buttons at the top of it.
6. Return to the panel and click **Generate round 2**. The server pairs teams on similar scores, and nobody meets the same opponent twice. Repeat up to round 5.

Careful

The next round can only be generated after *every* result of the previous round is published. If you get the message “Publish all results in the previous Swiss round before generating the next round”, open **Approvals** and publish the remaining ones.

Tie-breaks. Boys (Swiss): match points, then Buchholz Cut-1, then Sonneborn–Berger. Girls (round robin, 6 teams): match points, then Sonneborn–Berger, then the direct encounter.

8 Standings and brackets

- **Standings** shows a points table per sport. Open the sport's tab. For E-Sports, choose Valorant, Free Fire or BGMI above the table.
- A team gets points only from *published* results.
- **Bracket** shows the knockout draw; winners appear in the next round after publishing.

9 If something goes wrong

Message or problem	What to do
“Both teams must be determined. . .”	The earlier knockout matches are not published yet. Publish them first.
“...cannot end level”	A set, a quarter or a Valorant match was entered level. Correct the score or add overtime.
“Best of 3: one team must win 2 sets”	Enter the deciding set.
“The match was already decided — remove the extra set”	Clear the surplus set or game.
“Each team plays 4 players: enter all 4 boards”	Chess always needs exactly four boards.
A table tennis set is rejected	Sets are to 11 and won by 2 (11–9, 12–10, 13–11).
“Knockout match is level — enter the penalty shoot-out”	Tick Decided on penalties and enter it.
“Official result has already been published”	Use Override on Approvals with a reason.
“You are not authorized. . .”	You are working on a sport that is not yours, or your role is missing. Contact the Web Development team.
A team is missing from an E-Sports lobby	Use + Add team .

Tip

Before a busy session, refresh the page. If a result seems not to save, wait a moment and check **Approvals**: it may already be there. Do not submit the same result twice.

10 Quick reference

Enter a result: Match Manager → **Enter result** → fill scorecard → **Submit final result**.

Publish it: Approvals → **Approve & publish leaderboard**.

Change a time or venue: Match Manager → **Manage** → **Reschedule** → **Confirm Reschedule**.

Fill a 3rd-place match: **Manage** → **Edit** → choose both teams.

Next chess round: Scorer → **Chess Swiss rounds** → **Generate round N** (after publishing round N–1).

Add a Free Fire / BGMI team: open the lobby form → **+ Add team**.

Wrong published result: Approvals → **Override** + reason.

Need help during the event? Contact the Web Development team at the control desk.
